

MAIN CLAIM

I claim:

- 1) A method for facilitating donations from one or more donors to one or more organizations comprising:
 - a) A means for registering donors,
 - b) A means for allowing donors to select organization(s) to donate to,
 - c) A means for specifying an amount to donate to each selected organization on a periodic basis,
 - d) A means for collecting money from donors on a periodic basis based on their said specified donations
 - e) A means for calculating the sum of all donations for each organization
 - f) A means for reporting to said organizations the amount of the donations to said organizations from said donors,
 - g) Whereby donors can make periodic donations to one or many organizations with a single payment.

DEPENDENT CLAIMS

I claim as dependant upon the main claim (Claim 1):

- 2) A method for communicating requests for action from said donors to said organizations for which they donate comprising:
 - a) A means for allowing said donors to specify the action to be requested,
 - b) A means to report to said organizations necessary information about said donors,
 - c) A means for eliminating redundant reporting of information about said donors to said organizations

(i.e., to prevent multiple request records during a single reporting period).

- 3) A method for counting the number or rejected billing attempts against said donors to identify and notify inactive donors.
- 4)
- 5) A means for subscribers to terminate the donations.
